## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed with respect to claims 19-27 have been fully considered but they are not persuasive. The applicant contends that the "tangible computer readable media" is statutory subject matter. The examiner disagrees with the applicant's assertion. The examiner recognizes that "when functional descriptive material or recorded on some computer readable medium, it has structurally and functionality interrelated to the medium. However, the fact that the medium is described as transmission medium makes the claim nonstatutory. The Interim Guidelines for Subject Matter Eligibility from the Official Gazette on November 22, 2005 indicates that signals, i.e. transmission media, is not recognized as one of the four statutory groups, please refer to Annex IV, section C. The applicant's specification describes different types of media, both storage media and transmission media whereby the claims recite of a "medium" which is interpreted to be either of those two types. The examiner suggested amending the claims to recite of a "storage media" which would exclude transmission media from being claimed, however the applicant has failed to amend the claims and the rejection is still applied to the claims 19-27.
2. Applicant's arguments filed with respect to the claims have been fully considered and are persuasive. The rejection in view of Togawa and Flowers has been withdrawn.

***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 19-27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims recite of a "tangible computer readable medium", however, according to the applicant's specification on page 3, lines 7-8, the "medium" is disclosed as a "transmission medium" which does not fall into the four statutory classes. Page 2, line 25 of the applicant's specification discloses that the medium is a "storage medium". The examiner proposes amending the claims to recite of "tangible computer readable storage medium" to overcome the rejection.

***Allowable Subject Matter***

5. Claims 1-18 and 28-36 are allowed.

***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
